Hematology Analyzer

Rawlins County Health Center Lab Department is excited to begin using a new Hematology Analyzer. A hematology analyzer is a machine that runs a CBC (complete blood count), which is used in traumas and many lab orders. Thanks to the funding from the Dane G. Hansen Foundation and the Rawlins County Health Center Foundation, this vital piece of equipment was upgraded to a better unit. The hematology analyzer is critical to providing efficient quality healthcare, and Rawlins County Health Center is grateful for the funding to continue to provide quality healthcare to Rawlins County.

Well-Child Visits/Physicals

Rawlins Clinic reminds everyone of the importance of annual physicals and well-child visits. As part of a well-child visit, sports physicals, preschool, and kindergarten paperwork can be filled out for the following school year. Most insurance companies cover a well-child visit as preventative care. Check with your insurance company and schedule a well-child visit. A sliding fee scale is available for those without insurance or with high-deductible insurances.

Welcome New Employees!

Ericka Castro, Hospital LPN II
Grace Dunmoyer, Hospital Patient Care Tech
Brett Johnson, Support Services Tech
Steve Carpenter, PRN Support Services Tech
